

Miles of Trails

Presently the Town's network of maintained trails is significantly above the national recommended amount. Last year there was a 2% increase of maintained trails constructed and added to the Town's network.

Overview

Prior to the establishment of the Open Space program in 1997 the Town managed 10.8 miles of trails. Today the program manages 54.7 miles of multi-use trails. In the last year 3.8 miles of new trails have been constructed and added to the Town's trail network. In addition to the Town's trail network, there are over 100 miles of trails on United States Forest Service land which compliment the Town's trail system.
